Location: The Chedi: 18th November Street, PO Box 964, PC 133, Muscat, Sultanate of Oman.
Luxury hotel resort with guest rooms, suites, multiple food & beverage outlets, functions / events / meeting rooms and extensive leisure, fitness, spa facilities.

Introduction

This Coronavirus Disease (COVID-19) Risk Assessment / Internal Emergency Plan relates to the luxury hotel resort trading by the name of The Chedi. The document has considered the Oman Ministry of Legal Affairs controls for managing private sector establishments (See Violations 1-20) to prevent the spread of Coronavirus (COVID-19). It has also has referenced the WHO guidance and UK Government guidance relating to keeping workers & Guests safe during COVID-19. Leading Hotels of the World (LHW), international hotel and hospitality sector guidance and British Airways travel guidance has also been taken into account.

This document is up to date as of 10 July 2020. As of this time hotel Restaurants / Bars / Swimming Pools and Gyms are not permitted by the authorities to be open in Muscat although controls for re-opening these areas have been assessed as it is hoped that current restrictions may be lifted by the time The Chedi re-opens on 14 September 2020.

The purpose of this COVID-19 Risk Assessment / Internal Emergency Plan document

By setting concerns and control measures out in a logical way within this Risk Assessment / Internal Emergency Plan we shall give confidence to the competent authorities, their enforcement officers and our Guests that due considerations, to control the risks of operating whilst Coronavirus (COVID-19) is present in the community, have been thoroughly undertaken. Guests will be advised of the actions taken to demonstrate that the business has considered everyone's safety in relation to COVID-19. New "rules" will be clearly signposted so that everyone's expectations can be managed and people can confidently and safely enter the premises. Associates will be reassured that every aspect of their work has been considered and they will be given an understanding of the measures that are required and how to apply these to ensure the safety of themselves, our Guests and Visitors.

At the time of compiling this Risk Assessment / Internal Emergency Plan over 51,000 confirmed cases of Coronavirus (COVID-19) have been reported in Oman although the likelihood of becoming infected is currently considered to be 'Low' as approx. 1 in 4000 people are testing positive each day. The severity of illness is however 'high' as the consequence of contracting the virus and becoming symptomatic can potentially result in serious illness or in some cases, death (0.5%). A medium risk rating therefore applies across all hazards at this time.
